ARZOO TARANA

Python Full Stack Developer

Mudigere, India | +91 9980201106 | arzootarana0828@gmail.com | LinkedIn | GitHub | HackerRank

OBJECTIVE

Python Full Stack Developer with hands-on experience building responsive web applications using Python (Flask), HTML, CSS, and JavaScript, along with REST API development and CRUD-based database integration (MySQL, MongoDB). Comfortable working across the stack and collaborating with development teams using Git/GitHub to deliver user-centric applications.

SKILLS

Programming Languages: Python
Frontend Development: HTML, CSS, JavaScript
Backend Technologies: Python, Flask, REST APIs
Databases: MySQL, SQL
Tools & Platforms: Git, GitHub, VS Code
Core Concepts: OOP, Responsive Web Design, REST APIs, CRUD Operations
Operating Systems: Windows 10, Linux (Ubuntu)

EDUCATION

Bachelor of Engineering, Computer Science and Engineering — KNS Institute of Technology — *Sep 2022 – May 2026*
GPA: 8.0 CGPA

Pre-University (PU) — Nalanda Achievers Ascent PU College — *Jan 2021 – Jul 2022*
GPA: 74.45% | Mudigere, India

SSLC (10th) — Nalanda English Medium Higher Primary High School — *Apr 2019 – Jul 2020*
GPA: 84.96% | Mudigere, India

EXPERIENCE

Python Full Stack Intern — Dhee Coding Lab *June 2026 – Present*

- Assisted in building full-stack web applications, developing backend logic with Python (Flask) and frontend interfaces with HTML, CSS, and JavaScript.
- Worked with MySQL and MongoDB to design and manage application data, performing CRUD operations and supporting database integration.
- Collaborated with the development team on debugging, testing, and version control using Git and GitHub.

PROJECTS

COVID Management System — GitHub

- Designed and developed a comprehensive COVID management system using HTML, CSS, JavaScript, and Flask.
- Improved clinic operations by streamlining patient record handling, reducing manual paperwork, and enabling seamless doctor-patient interaction.

Hospital Management System — GitHub

- Built a hospital management system to digitally record and manage doctor and patient data, reducing manual paperwork.
- Implemented an online appointment booking feature allowing patients to view available slots and schedule appointments.

Brain Tumor Detector — GitHub

- Built a brain tumor detection tool applying generative AI to analyze MRI scan images and flag potential tumors, supporting faster preliminary screening.

ACHIEVEMENTS

- HackerRank profile: hackerrank.com/profile/arzzt1828

CERTIFICATIONS

- Python Certification (120 Hours) — ID Tech Solutions Pvt. Ltd., Apr 2025 – Jun 2025
